④ 

-
- The diagram illustrates two different data distributions. In the top set, a single data point (black dot) has a value of 5, while the rest of the data (open circle) is spread across 25 units. In the bottom set, the single data point (black dot) also has a value of 5, but the rest of the data (open circle) is spread across 25 units, with a different distribution pattern than the top set.
